

Children can learn math facts on their own... if they want to.

You can help them want to, in just one minute a week.

When children know you will be watching, they practice more, and with more effort. This helps children succeed in math, in school, and in life!

Get a free app to help children practice on their own.

The app makes it easy to follow their progress.

Get the app and printable flashcards at studysmart.com.

Children practice towards a goal. Celebrate with them!

If they get 100%, congratulate them and mark the chart below.

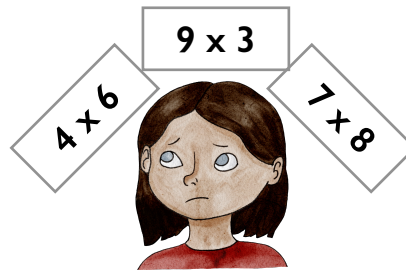

If they miss a few, they practice and try again.

Every week children make progress and grow confidence.

Parents, math facts are the foundation to success in math. Take a minute each week to watch your children answer facts.

Your participation means everything to them. Be their biggest fan!

Children who do not know facts struggle.
Children who know facts are free to enjoy math.

Name of child: _____ List: _____

Parents: Please check the boxes and sign.

I watched my child answer math facts. Did they get 100%? Yes No

Parent Signature: _____
